EXTRA VIRGIN OLIVE OIL COSMETIC LINE

Olive oil is the only oil that naturally contains vitamin A, a true booster of cell regeneration, and chlorophyll that strongly conditions cell growth and cicatrization. This is the reason why olive oil is a traditional component of several folk medicine formulas against burns, pruritus and dermatosis.

In cosmetics, thanks to its high unsaponifiable content and its emollient and smoothing properties, olive oil is surely the best from vegetable oils to prevent ageing and to reduce the appearance of wrinkles.
